

# Environmental Policy

Centrogen, as a provider of vegetation management solutions, recognises it has an important obligation to ensure good environmental performance in its business operations and to provide the necessary organisation, commitment and training to fulfil this obligation.

Centrogen maintains an ISO certified Environmental Management System that allows it to provide services with minimal risk of damage to the environmental aspects of air, water, waste, land, biodiversity, community, energy and resources.

To minimise environmental impact arising from our activities, services and products, we will:

- Take accountability for maintaining an ISO 14001:2015 certified Environmental Management System;
- Ensure the integration of environmental management system requirements and conformance into business processes;
- Comply with relevant environmental legislation and compliance obligations, as well as other social obligations applicable to the Company, our employees and contractors;
- Include the consideration of environmental issues in business strategies and initiatives;
- Pursue continuous improvement in environmental performance, where reasonably practicable, by providing a framework for the establishment and achievement of environmental objectives;
- Prevent pollution, reducing and recycling waste and minimising the consumption of resources;
- Partner with suppliers whom are environmentally proactive to ensure purchasing in an environmentally sustainable manner; and,
- Educate, train and motivate employees to carry out tasks in an environmentally responsible manner.

Management takes accountability for the effectiveness of the environmental management system and will periodically review its performance against environmental objectives to ensure it achieves its intended results.

Centrogen is committed to continual improvement of environmental performance. This Policy will be communicated to all clients, employees and contractors and is available to interested parties via our website at [www.centrogen.com.au](http://www.centrogen.com.au)

Everyone is responsible for environmental management within Centrogen.
